Projects

E-commerce Application: Ecommerce refers to when individuals or companies buy and sell goods or services online. Ecommerce can take place within a company's smartphone app, on a social media platform, or in an online marketplace. You can participate in ecommerce anywhere you can establish an internet connection. Common examples includes online shopping, electronic payments, online auctions, and internet banking.

Online Tutoring Platform: Tutoring programs are those organizations that offer one-on-one and/or small group tutoring directly to students, either in-person, virtually, or through both modes of delivery.

Minimatic Solutions: Minimatic Solutions: Crafting seamless digital experiences. We specialize in website, software, and app development, ensuring optimized, efficient solutions with minimal bugs for our clients' success.

Interests

Web Development: Keeping up with the latest trends and developments in the field.

Sports: Playing football and online game in my free time.
